Hooza Podcast

A french media platform with free audio content

Hooza Media wanted to launch a podcast for the audio content in French they've produced over the years, we were able to create an app in a few days and upload the content of an audio book "Biserero, le ghetto de Varsovie". It was great to see how No-code really makes implementation easy and fast.

Webflow the no-code platform for designers

Webflow is a professional no-code development platform for designers, it allows you to create beautiful responsive websites.

The Webflow platform is for freelancers, agencies, marketing teams, business owners and prototypers.

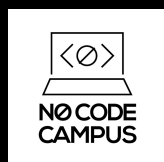

We like webflow for the ease of use and the option it offers for more complex projects

The Webflow logo is displayed in a large, blue, rounded, lowercase sans-serif font. The letters are thick and have a slight shadow effect, giving it a three-dimensional appearance. The word "webflow" is centered horizontally and takes up most of the width of the page.

Welcome to No-code Campus

Thanks to aife.ai, this website has been created in less than an hour, the artificial intelligence did all the lifting we just added bits and pieces of our own.

Give it a try and see for yourself.

A tagline. Just do it.
