Hardware feel and appearance

The screen surround and outer shell are 3D printed with SLA resin and are sanded to have a smooth appearance and feel. However we cannot guarantee the complete absence of some minute imperfections (scratches, lines, small pits, or small amounts of warping) that may be noticeable on close inspection.

Please note that due to ongoing component availability challenges, the micro switches and LED screen components may be sourced from different manufacturers and thus may vary slightly per batch (but always of comparable quality).

Shipping, delivery and returns

Shipping costs vary depending on destination. Standard and Express options are selectable on checkout. Both require signature-on-delivery. Please see [here](#) for delivery time estimates. We endeavor to ship your Woovebox next business day upon ordering, however this may increase to up to 7 business days in the event of extreme demand spikes. You will receive emails from Australia Post ("auspost.com.au") with shipping updates and a tracking number. Please contact us with your order number if you have not received your tracking info email within 3 business days.

We offer a 7-day money back guarantee for Woovebox units sold directly by us; the 7 days are counted from the arrival of the item. Your Woovebox has to be in an "as good as new" condition for us to accept full refunding. We do not offer returns on accessories.

If your Woovebox is demonstrably defective upon receipt, we will cover the shipping charges. In all other cases, the customer covers all shipping charges. You must contact Woovebox first before returning, and you cannot return simply due to a "change of mind"; please make sure the Woovebox is fit for your

Buy

particular purpose, for example by acquainting yourself with the hardware's quirks and limitations.

If returning, your Woovebox must be returned in original packaging and packed well. In case these conditions are not met, we reserve the right to impose a fee or refuse to accept the return.

Country-dependent costs, regulations and exclusions

Please note that if you reside outside of Australia, you are responsible for any additional taxes (such as VAT or any import taxes) and/or import or compliance regulations that may apply to your country or region. Please note that we cannot ship to Belarus, Russia or Ukraine at this time.

Make more music, with less.
